

TravelPass plugs into airline IT

TravelPass is offered as a service integrated with your system environment. It utilizes industry standard technologies as well as best of breed software and hardware configurations – all in a swift and cost efficient manner. In short time, your airline can benefit from new commerce from subscription products.

The illustration below represents a typical integration (blue areas are included in the TravelPass product).

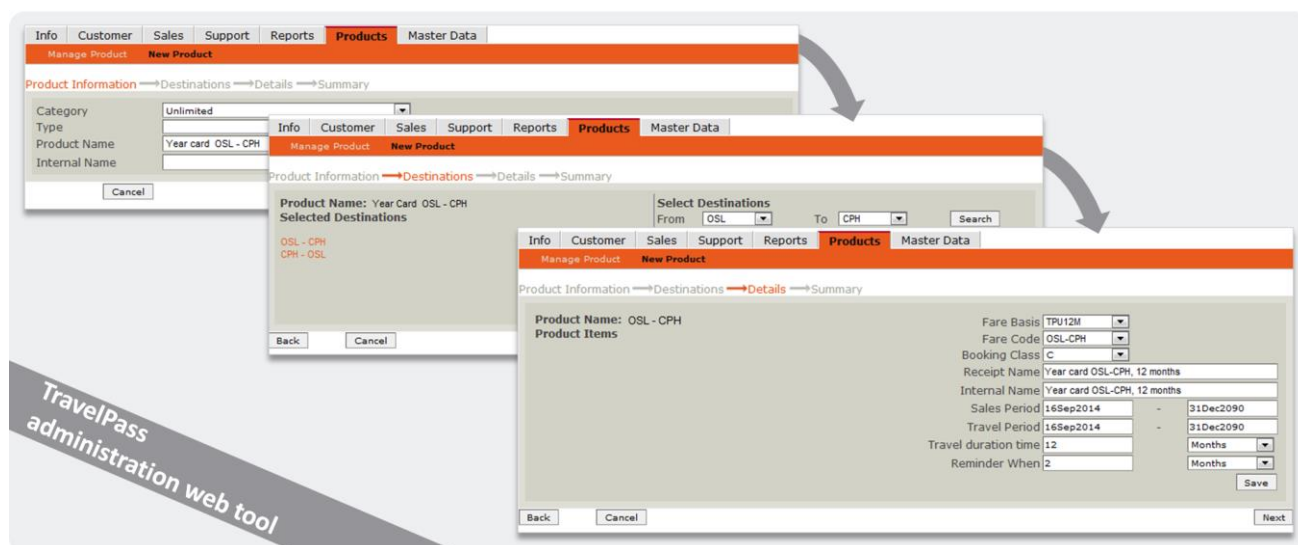

TravelPass can be integrated with any PSS. Currently, airlines have integrated their TravelPass products with

Amadeus and HP. Other related resources, like PSP, Loyalty and Customer databases are integrated according to the airlines' requirements. TravelPass' library of connectors and web services is built to fit into the systems of airline industry. The enterprise class software platform, including latest web service APIs and message driven architecture, supports modern integration

frameworks. Implementation is efficiently done in a short time to market manner.

TravelPass provides business logic that can be configured according to the airline's needs. A wide range of functionality is available in menus of parameters and options, easily set and managed in an administration web tool by the airline staff. Furthermore, reports and statistics are available for view in the web browser or export to excel or other formats. The illustration below shows extracts from the process of defining a 12 months unlimited Oslo - Copenhagen product.

TravelPass.

The airline web CMS integrates with TravelPass for self service sales of subscription products as well as travel booking and management. The example on the left below shows a search for Oslo – Stockholm products by SAS. The result returns both city pair and zone products with 6 and 12 months duration. SAS’ integration in the traveler’s mobile app is shown to the right below. The product example is Worldwide Pay-as-you-fly.

The image shows two screenshots. On the left is a desktop view of the SAS website search results for 'Travel Pass Unlimited' products. The search criteria are: From destination: Oslo, To destination: Stockholm, Product category: Unlimited. The results table is as follows:

Travel Pass Unlimited	Multiple	Total Punches	Duration Time	Class	Currency	Total Price	Fare	Taxes	
Oslo-Scandinavian capitals 12 months	No	Unlimited	12M	C	NOK	200,843	167,400	33,443	Select
Oslo-Scandinavian capitals 6 months	No	Unlimited	6M	C	NOK	120,488	103,600	16,888	Select
Oslo-Stockholm 12 months	No	Unlimited	12M	C	NOK	164,047	132,000	32,047	Select
Oslo-Stockholm 6 months	No	Unlimited	6M	C	NOK	96,523	80,000	16,523	Select

On the right is a mobile app interface for 'BOOKING' and 'TRAVEL PASS'. It shows a 'Worldwide' travel pass with invoice number 911126522, from Copenhagen (CPH) to Oslo (OSL). A blue banner at the bottom of the app interface reads 'Traveler's booking and flight management'. A diagonal banner across the bottom of the entire image reads 'Customer's self service acquisition of products'.

Travelpass is offered as a hosted service. All licensed products from Oracle Inc. are under an embedded software license (ESL). This license restricts the use of Oracle products for the purpose of running the TravelPass system.

Travelpass is offered as a hosted service which means there is no need for the airline to install or maintain software, hardware, or go through complex implementation projects. We offer hosting in a private cloud environment designed specifically for running Travelpass. Our standard offering includes premium data center facilities with global coverage, secondary site with real time data replication, single point of contact 24/7 support, SLA with uptime promise and all necessary licenses. As Oracle gold partner, Braathens IT provides Travelpass in combination with a wide range of proven Oracle products, from smaller implementations based on Standard Edition/Standard Edition One to large-scale, clustered Enterprise Edition deployments; all running on Oracle’s own virtualization technology, Oracle VM Server. For the airline this means short implementation time and the possibility to start off with no initial investment and grow gradually as needed.

Braathens IT is the provider of TravelPass to the airline industry. The company offers operation critical software systems to the airline industry, such as TravelPass (subscription products), Internet Booking Engine (ticket and ancillary merchandising), Loyalty and Station Products (self-service check-in kiosks, tagomats and speed-gates), running more than five million yearly transactions for its customers, including SAS, Swiss, Brussels Airlines, Malmö Aviation and Sverigeflyg. Braathens IT’s systems are integrated with PSS and GDS providers, such as HP and Amadeus. Braathens IT is based in Oslo, Norway, and targets aviation as well as travel industry.
